AGF High Performance Absolute Filter Bag

AGF filter bag is made of pure melt blown polypropylene fiber, and with the latest filter technology, it is high efficiency filter bag, leading the bag filter to a new realm.

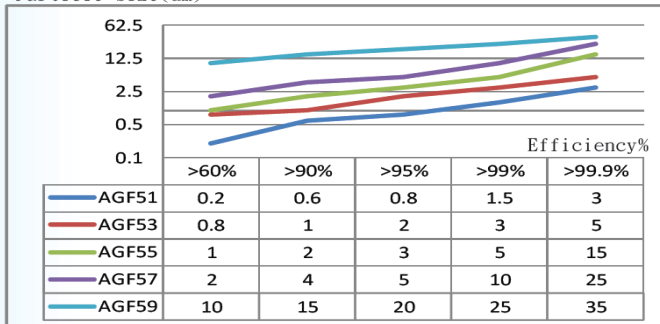

Features & Benefits

- High efficiency filter bag, the graded density of the material for better capacity and extending the service life.
- The double outer protective layers eliminate the problem of fiber release.
- The filter bags are made of FDA approved materials.
- 100% pure meltblown polypropylene construction without adding any resin, binder or surface treatment.
- Full welding technology with collar design.
